

# WIS 47/County A intersection study Project Update

Transportation District 3  
January 2003

## In this issue

A new alternative has been developed and will be presented at a public information meeting in February or March. Invitations for the next public information meeting will be mailed in February.

## New alternative developed

Four fly-over alternatives were presented at a public information meeting in October 2002. All four addressed the need to provide safer, more efficient turning movements at the WIS 47/County A intersection. There was concern about the relocated County A/Stingle Road intersection. Many residents held the opinion that the fly-over alternatives shifted the traffic problem to Stingle Road. The Wisconsin Department of Transportation (WisDOT) has continued to study how well the fly-over alternatives connect to the local road system.

As a result of comments and concerns presented at the public meetings, a new alternative was developed. This new alternative eliminates the need to shift County A to line up with Stingle Road, therefore minimizing traffic impacts to the existing Stingle Road intersection. Other reasons for developing the new alternative include reducing impacts to existing development, providing better access for farm operations, and the need to lessen impacts to the local road system. It also provides a local road system that can be expanded to meet future development that may occur in the area.

(Aerial photo of existing intersection)

The new alternative will be presented along with the previous fly-over alternatives at a public information meeting in February or March. The previous fly-over alternatives are still being considered and will be compared to the new alternative. Details on the meeting location and date will be available in February.

**Revised Schedule:** The project schedule has been revised as follows:  
Public information meeting #4. ....February/March 2003  
Selection of preferred alternative. .... April 2003  
Completion of environmental document. ....May 2003  
Acquisition of real estate .....To be determined  
Construction. ....To be determined
